

CORRIGENDEM

In partial Modification of the office Notification issued vide no. SMVDU/A&E/10/565-69 dated 27th July 2010, kindly read "Point No. 9 & 12

As

9. SMMSS will be awarded to the newly admitted students on the basis of their score in competitive examination (AIEEE for B.Tech and B.Arch), performance in MAT and/or CAT+GD+PI (incase of M.B.A. and M.B.A. (BE)), percentage of marks in qualifying examination incase of the programmes where admissions are based on the same. In case of the programmes where admission is not on the basis of merit rank order of any national level entrance examination we may follow the percentage of marks obtained in the qualifying examination by the concerned candidate as the criteria for award of SMMSS with a lower ceiling of 80% minimum.
12. Incase if two students obtain same CGPA in a given semester.

Such a situation shall be dealt with in the following manner:

Example: For instance there is a situation such as the follows for class strength of 55 to 60 students:

No of students eligible	=	06
Student No. 01		has CGPA of 9.22
Two students at No. 02		having CGPA of 9.15 each
Student No. 04		has CGPA of 9.12
Student No. 05		has CGPA of 9.10
Student No. 06		has CGPA of 9.08
Student No. 07		has CGPA of 9.00

[Total no of students in the above example is 06]

Solution:

- Since there are two students at S. No. 2 therefore S.No.7 is automatically ineligible for award of SMMSS so as to maintain the overall no at 06 (10%).
- Under normal circumstances S. No. 2 is eligible to receive 75% waiver and S. No. 3 is eligible to receive 50% waver. Therefore to deal with such a case as above calculate the mean of the two percentages $[(75 + 50)/2 = 62.5\%]$.
- Therefore S. No. 1 would receive 100% waver, the two students at S. No. 2 receive an equal percentage waiver of 62.5%, S. No. 3 receives 30% waiver, S. No. 4 receives 20% waiver and S. No. 5 receives 10% waiver.

All other things as notified in the above mentioned notification remain the same.
